

SPEAKER: Senator DeCamp.

SENATOR DE CAMP: Mr. President, members of the Legislature, I know that at this late date this will fall on deaf ears, but I'm thinking in the same terms of Senator Barnett, I feel that we have all been played for suckers here. As I stated here the other day, we have hundreds of thousands of dollars and thousands of hours invested in the underlined bills and I think that there was a complete and deliberate plan by certain ones to make sure that we never did reach those. By playing the old amendment game coming up with a new amendment every twelve seconds we can go forever on Select File. I think that the Chair knows and every member of this body knows that if we stay on Select File at this time we are never going to get to those bills. I have a motion up there that we would go to general file now and devote X number of minutes to each bill have a vote on it and if it goes fine, and if it doesn't the bill would go down to the bottom of general file. I think that we were sent down here to do the work that is up there and most of the amendments that are springing up and have sprung up on the budget bills are a lot of the spur of the moment things

(end belt #1)

(start belt #2)

somebody wants a \$100,000 more or \$15,000 more or one thing or another and they are not things that really have had all of the time and effort put into them that these other bills have. There are bills there on General File that are vitally important that we get passed this year. I think that it is time that we quit being merely a political merry-go-round in here and actually spend one or two days getting some work down. If we would go to general file we could probably handle about half of the... particularly the non-controversial things and get a lot done. It would not jeopardize or screw up the schedule. We can still handle this stuff on Select File a later on, even if we had to do it on the last day or so, but if we don't get something done on General File today it is a dead game, we are out of it and those that want to use this as I say for a political merry-go-round in here will have had a complete victory. After this motion is voted on, I have a motion up there that we return to General File and the motion includes how much time we spend on each bill and how the thing will be handled. As I say this may be a losing cause but I'm not going out of here without at least making an attempt to do the business that we came here for. WE have 400 bills up there and we fool around here on one rinky-dink amendment after another.

SENATOR NORE: Mr. President, members, I thought that we made a deal yesterday, and to me a deal is a deal. Lets stay with the adjournment schedule that we decided on yesterday and then get about our business. I'm going to vote against everything.

SPEAKER: Senator C. Carsten. I guess that he passes. Senator Whitney.

SENATOR WHITNEY: Mr. President, members of the legislature, it would seem to me that either the Carpenter motion or the Barnett
